COMPANY BACKGROUND *Corporate overview, registration, and financial profile*

SD Event Management Limited (NI619722) is a Belfast-based entertainment and events management company. Incorporated on 7 August 2013, it is a private limited company with registered address at Suite 6 Alexander House, 17a Ormeau Avenue, Belfast BT2 8HD (Companies House). It is classified in the Spectator Sports / Arts, Entertainment, and Recreation sector (D&B). The company is the operating entity for Shine Productions, one of Northern Ireland's most established live music businesses, encompassing the Belsonic, Emerge, and CHSQ festivals, plus venues including The Limelight, The Telegraph Building, and Dublin's Academy (news search).

Ultimate beneficial ownership traces through Fariss Ltd (NI648712) to Alan Simms, who holds 75%+ of shares (Companies House PSC register). Simms holds 8 active directorships across entertainment-related entities (public records). He is a well-documented music industry figure with a 30-year career in Belfast. Two additional directors — Joseph Dougan and Orla Farquharson — were appointed on 16 October 2023 (Companies House).

Sanctions screening returned zero matches across all databases: Bridger XG, OFAC SDN, UK FCDO, EU Consolidated List, UN SC, ICIJ Offshore Leaks, BIS, World Bank, FBI, and INTERPOL. No adverse media was found for the entity or any associated individual.

The dominant risk is complete business sector mismatch. SD Event Management operates exclusively in live entertainment (SIC 93290). It has no discernible connection to any of COPAP's three product lines — Paper & Pulp, PVC, or Petrochemicals. Yet COPAP booked a single order on 22 January 2026 for 197 pallets of C2S Art Board valued at \$160,118, with \$163,320 now outstanding. Third-party data estimates annual revenue at approximately \$200,000 (public records). A paper order equalling roughly 80% of the company's annual turnover lacks apparent commercial rationale and constitutes a potential TBML indicator. **Overall Risk Rating: MEDIUM-HIGH.** Recommend hold on further shipments pending clarification of commercial purpose.

KEY RISKS & RECOMMENDED ACTIONS

Positive Indicators

- Zero sanctions matches across 10+ databases for entity, holding company, UBO, and all directors.
- Active, filing-current company with accounts submitted through 31 December 2024.
- UBO Alan Simms is a publicly profiled, award-winning music industry figure with 30+ years of traceable career history.
- No adverse media, litigation, or regulatory actions identified for any associated person.
- ICIJ Offshore Leaks database returned clean for all screened parties.

Residual Risks Requiring Follow-Up

- Complete sector mismatch:** Entity operates in live entertainment (SIC 93290). No connection to Paper & Pulp, PVC, or Petrochemicals. This is not a downstream end-user — events companies do not consume 197 pallets of 250gsm art board.
- Order disproportionate to revenue:** Single COPAP order (\$160,118) represents approximately 80% of the entity's estimated annual revenue (\$200,000). Inconsistent purchasing volume for a 3-person events company.
- 100% outstanding AR:** \$163,320 unpaid. Zero payments received. No prior trading history.
- PSC identity partially opaque:** While UBO chain to Alan Simms is traceable through Fariss Ltd, the named PSC on the public Companies House web record was not displayed. Formal confirmation via certified extract recommended.
- Growing net current liabilities:** Third-party financial aggregators indicate net current liabilities grew from ~£160K (2020) to ~£4.4M (2024). Credit exposure should be closely managed.

Recommended Actions

- HOLD all further shipments** to SD Event Management Limited until commercial rationale for the C2S Art Board purchase is documented and verified by the originating sales desk.

12. Request written explanation** from the counterparty contact specifying the intended end-use of 197 pallets of 250gsm C2S Art Board. If the stated use is resale or on-behalf-of-purchase, identify the actual end-buyer and screen separately.
13. Verify the ordering individual's authority** — confirm the person who placed the COPAP order is an authorised representative of SD Event Management Limited and not a third party using the company's name.
14. Escalate the \$163,320 outstanding AR** to credit control for active collection. Apply credit hold pending payment receipt and commercial clarification.
15. Obtain a certified Companies House extract** to confirm the current PSC identity and verify the Fariss Ltd → Alan Simms UBO chain.
16. If commercial rationale is established** (e.g., purchasing on behalf of a group company's printing supplier), re-rate to LOW and proceed. If no rationale is provided within 30 days, escalate to BLOCKED.
17. Overall Risk Rating: MEDIUM-HIGH
18. The sanctions and integrity profile of SD Event Management Limited is clean. The entity, its directors, and UBO are legitimate, documented, and publicly active in the Northern Ireland entertainment sector. However, the single COPAP transaction raises serious questions about commercial rationale that

Belsonic is Northern Ireland's largest live music event (Belfast City Council publication).

Estimated annual revenue for SD Event Management Ltd specifically is approximately \$200,000 (public records).

However, the combined turnover across all Alan Simms directorships is approximately £19.6 million (public records). The entity employs approximately 3 staff directly. No ISO, REACH, or EcoVadis certifications were identified, consistent with an entertainment business.

Alignment with COPAP product lines: NONE. The company's business sits entirely outside all three of COPAP's trading lines (Paper & Pulp, PVC, Petrochemicals). There is no manufacturing, printing, converting, chemical processing, or any other industrial activity associated with this entity. It is not a downstream paper buyer (publisher, printer, converter), not a PVC consumer, and not a petrochemical user. The COPAP order — 197 pallets of C2S Art Board 250gsm — is a commercial-scale paper shipment with no identifiable end-use within an events management operation. No dual-use chemical concerns apply.

No trade

partners in sanctioned or high-risk jurisdictions were identified. No shipping routes or freight activity linked to this entity outside the single COPAP order.
